## Banks and Finance Companies - United States

# Underwriting standards for credit cards and auto loans tighten modestly, a positive

### Summary

The latest Senior Loan Officer Opinion Survey (SLOOS), released today, 8 May, reveals a modest tightening of bank underwriting standards for approving credit card and auto loan applications during the first quarter of 2018, a mild credit positive. Standards for residential mortgages were largely unchanged.<sup>1</sup>

Consumers are in better shape than they have been in quite some time, but there is a risk that they will take on too much credit in the present accommodative environment. Auto loan underwriting remains weak, and we expect credit card underwriting to deteriorate, despite the modest tightening indicated by the SLOOS survey. Our concern stems from lenders' tendency to grow complacent and increase the risk in their consumer loan portfolios, thinking they have plenty of time to tighten before the next downturn. Time and time again, lenders have proved unable to tighten in time.

Exhibit 1 summarizes underwriting standards and trends for credit cards, auto loans, and residential mortgages, including the current quarter SLOOS results and our projections.

Exhibit 1

### Auto underwriting remains weak; cards and residential mortgages expected to loosen Current underwriting standards compared to historical standards

|                              | Current underwriting standards vs. historical standards* | Trend over last two years | Current quarter's Senior Loan Officer Opinion Survey results | Moody's projected trends               |
|------------------------------|--|---------------------------|--|--|
| <b>Credit cards</b>          | Looser end of historically average standards             | Very modest tightening    | Modest tightening  | Loosening to moderately weak standards |
| <b>Auto loans</b>            | Weak   | Modest tightening         | Very modest tightening                                       | Remains weak                           |
| <b>Residential mortgages</b> | Tighter end of historically average standards            | Modest loosening          | Largely neutral  | Loosening to average standards         |

### Credit Cards: continued modest tightening of average underwriting standards

As shown in Exhibit 2, first quarter results indicate continued modest tightening of credit card underwriting standards. Of particular significance is that only one bank out of 53 surveyed reported modest loosening. The banks indicated that they had tightened standards with respect to minimum credit scores. Despite these results, we forecast a net deterioration in standards over the next 12-18 months.

We have been flagging a deterioration in credit card underwriting over the last several years, which resulted in the change of our credit card outlook to stable from positive in July 2017. We believe credit card underwriting is still at the looser end of average historical standards over the last twenty-five years or so. Given the solid employment market, high consumer confidence, and the strong profitability reported by bank's credit card segments, we expect underwriting standards to again begin deteriorating despite the modest tightening reported in the first quarter.

### Auto Loans: continued modest tightening of weak underwriting standards

As shown in Exhibit 3, first quarter results indicate auto loan underwriting continued to tighten, but only very modestly. We continue to believe that auto loan underwriting is weak. Loan losses have been only slightly above historical averages from the last twenty-five years or so, but they should be much lower given the strong economy. This points to underlying risk in the loan portfolios that is well above historical standards. Over the last two years, auto loan underwriting has tightened somewhat and loan growth has also slowed, a credit positive. But underwriting is unlikely to tighten sufficiently to reflect underlying risk because of the solid employment market and high consumer confidence.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the ratings tab on the issuer/entity page on [www.moody's.com](http://www.moody's.com) for the most updated credit rating action information and rating history.

**Residential Mortgages: largely unchanged solid underwriting standards**

Banks reported little change in underwriting standards for most residential mortgages. However, as shown in Exhibit 4, first quarter results indicate that underwriting standards modestly loosened for qualified mortgage (QM) jumbo mortgages, continuing the trend of the last several years. Of interest is that no surveyed bank reported a tightening of standards for QM jumbo mortgages.

Outstanding residential mortgage loan balances have recently increased a bit as purchase origination volume has increased and as underwriting standards have been loosening. Nonetheless, residential mortgage underwriting is on the tighter end of historically average standards from the last twenty-five years or so. Given the generally tight underwriting standards, we expect residential mortgage underwriting to continue loosening over the next 12-18 months, normalizing toward historical average underwriting standards.

**Endnotes**

- Two caveats to the implications of the survey responses, however, are that they reflect only the banks' own view of their underwriting and that non-banks, which are not surveyed, have meaningful market shares in auto loans and residential mortgages.

This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors. It would be reckless and inappropriate for retail investors to use MOODY'S credit ratings or publications when making an investment decision. If in doubt you should contact your financial or other professional adviser.

Additional terms for Japan only: Moody's Japan K.K. ("MJJK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJJK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJJK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJJK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJJK or MSFJ (as applicable) have, prior to assignment of any rating, agreed to pay to MJJK or MSFJ (as applicable) for appraisal and rating services rendered by it fees ranging from JPY200,000 to approximately JPY350,000,000.

MJJK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
